

## **MANAGED BUSINESS CONTINUITY SERVICES**

*KEEP YOUR CRITICAL SERVICES RUNNING REGARDLESS OF HUMAN ERROR, POWER OUTAGE OR NATURAL DISASTERS*

**LANWORKS™**  
PERSONALIZED IT FOR YOUR BUSINESS

# MOST DISASTERS ARE ACTUALLY MAN-MADE

## RECOVER YOUR WHOLE ENVIRONMENT OR JUST ONE SERVER IN AS LITTLE AS **10 MINUTES**

### INCREDIBLY FLEXIBLE DISASTER RECOVERY SERVICE

Lanworks Business Continuity and Managed Disaster Recovery (DR) Service replicates your virtualized environment to our secure data centre. Your DR replication environment can be accessed remotely or data centre onsite with available DR seating. Your systems can be selectively replicated as frequently as you wish and you can recover from the last replication or weeks back.

### AS UNIQUE AS YOUR BUSINESS

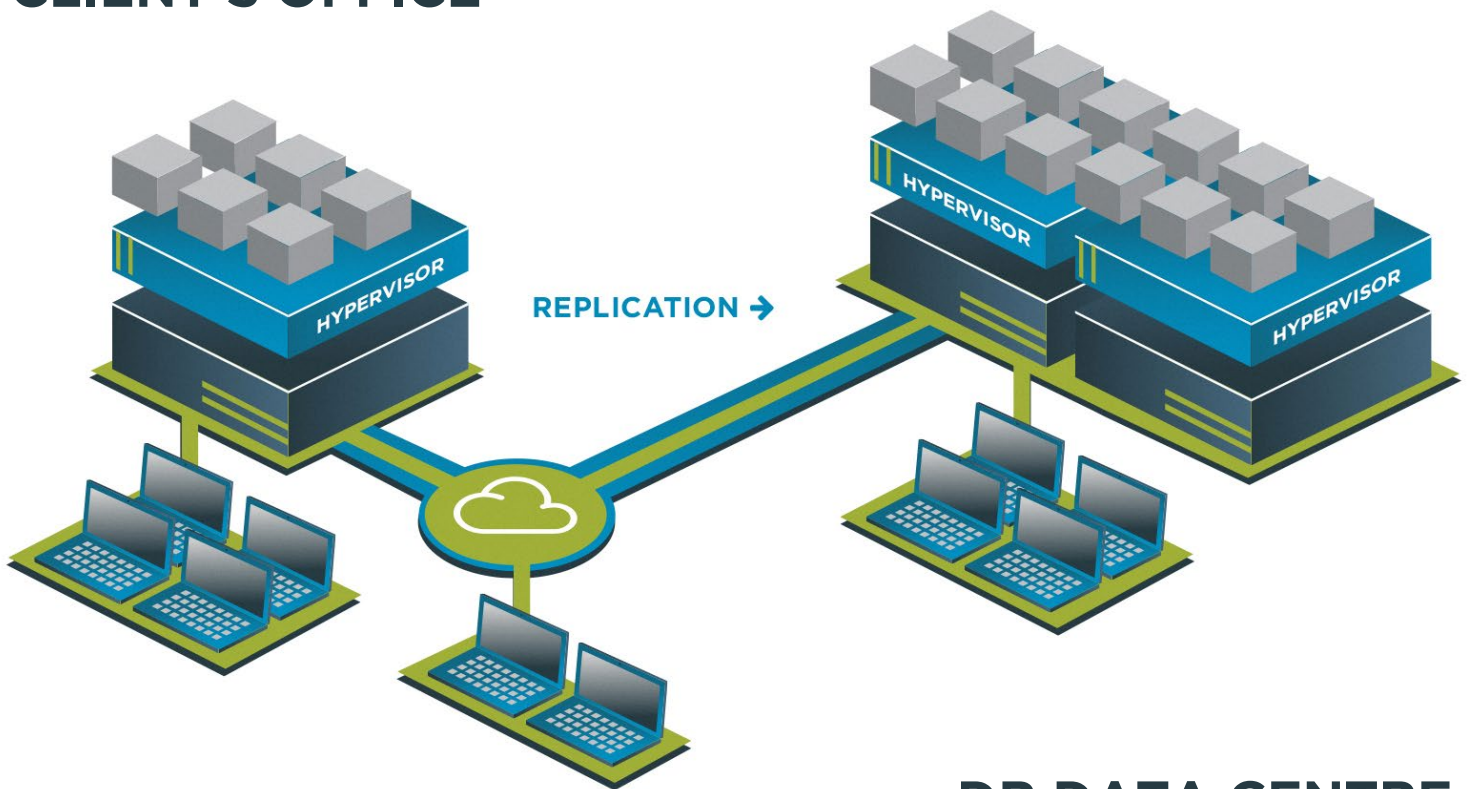

Every business is unique and Lanworks Business Continuity and Managed Disaster Recovery Services meet your distinct requirements with options ranging from self-managed to fully-managed DR, and daily, hourly or near-continuous backup with our highly-compressed, bandwidth-managed replication to avoid impacting network performance.

*"We needed to find a business continuity service that was fully automated and required as few of our resources as possible for the development, implementation and execution of the plan."*

*Chris Mascitelli,*  
Vice President, Computer Workware Inc.

## *LANWORKS OFFERS A COMPLETELY MANAGED DISASTER RECOVERY PLATFORM*

*PROVIDING A VARIETY OF OPTIONS WHICH RANGE FROM  
FULL DISASTER RECOVERY TO SINGLE SERVER RECOVERY*

- As Little as 10 minute Recovery Time Objective (RTO)
- Flexible Recovery Point Objective (RPO) from near instant to daily
- Ability to roll-back and recover the environment from previous day or week
- Integrated Data Compression usually allows use of existing data circuits
- DR Infrastructure can be accessed from any location with an Internet connection or by relocating select users to DR location
- Fully protect data and systems whether they reside at head office or a branch office
- Optional on and off site backup
- Very Low capital costs – simply use our Multi-Tenant platform at DR Site
- Protect critical applications such as Microsoft Exchange, Sharepoint, Websites and CRM systems
- Recover documents, databases or full applications
- Perform DR Test during business hours without risk of disruption to production environment
